Subject: Wallace yard Consent Decree

I received my EPA comment notice card today. I found it interesting and humorous. I do not support the railroads having to reimburse the EPA for their alleged cleanup. The mines and railroads at the time were following and complying with all local, state and federal guidelines laws, therefore did nothing wrong.

Furthermore if the DOJ wants something to investigate they should be looking into the EPA fraud being committed up the local citizens and the taxpayers of the USA. The epa is a joke and in my point of view is guilty of fraud, malfeasance and misfeasance.
